

SOPHOS

Security made simple.

Security made simple.

Modern networks and IT demands continue to get more complex, but your IT security doesn't have to. You shouldn't have to wrap new security systems around your existing one. There's a better way. It's simplified, powerful and proven.

From network to endpoint to server security, our products are designed to eliminate complexity. Simplified products make for simplified workflows. Users spend less time haggling with your admins. IT managers spend less time troubleshooting problems.

We know that most organizations don't have a large team of dedicated security experts. That's why we design our products to be easy to install, configure and maintain. Whether your business has 5 employees, 5,000 employees, or even more spread across multiple offices, you'll know everyone is secure with Sophos.

Network Protection

Our network security products include firewall, Wi-Fi, VPN, web and email protection. You'll have complete control over the security features you need all in one place. Plus our UTM is easy to deploy and manage so your users are always protected, wherever they roam.

Unified Threat Management

The ultimate network security package.

Next-Generation Firewall

This is where network threats go to die.

Secure VPN

Turn any location into a secure location.

Secure Wi-Fi

Super secure, super Wi-Fi.

Secure Web Gateway

Complete web protection everywhere.

Secure Email Gateway

Simple protection for a complex problem.

Web Application Firewall

Uncommon protection from common threats.

Enduser Protection

From PCs to smartphones, tablets and laptops, our endpoint protection keeps your users safe without getting in the way of their work—all within your antivirus budget.

Enduser Protection Suites

The all-in-one security suite.

Endpoint Antivirus

Essential protection for laptops & desktops.

Mobile Control

Countless devices, one solution.

SafeGuard Encryption

Encryption everywhere.

Server Protection

Our antivirus protection delivers rapid, effective protection across your network of physical and virtual servers.

Server Security

Pro-server. Anti-virus. And industry-leading VMware support.

PureMessage

Good news for you. Bad news for spam.

Network Storage Antivirus

High-tech security for high-tech storage.
